

Google. Done Right.

Our customers want to differentiate by adopting not just Google's cloud technology, but also their culture of innovation and sustainability. CTS helps you do just that.

One of Europe's largest dedicated Google Managed Services Providers

Infrastructure

Modern infrastructure & applications to support your growth.

The Google approach to sustainability, security and performance - alongside their contributions to the open source ecosystem - make GCP the best choice for modern workloads.

- ✓ Kubernetes & Anthos
- ✓ High Velocity Migrations
- ✓ Secure Software Supply Chain

Data

Use the industry's leading data platform to make smarter and faster decisions.

Google are the Gartner MQ front runner for data, artificial intelligence and machine learning services.

- ✓ Cloud Composer workflows
- ✓ BigQuery architectures
- ✓ Looker visualisation

Collaboration

Create a culture of innovation with more efficient and productive teams.

Workspace is the only collaboration platform that works seamlessly. On mobile, on any device, at any time. It will change how your teams work.

- ✓ Migration and deployment
- ✓ Complex change management
- ✓ Appsheet development

Why choose us?

- ◆ CTS was born in Google Cloud, it's all we've ever done, and ever will do
- ◆ Certified and audited by Google to the highest level, including MSP
- ◆ Sustainability is at the core of what we do, based around the principles of B Corp
- ◆ 2020 Partner of the Year for Workspace Enterprise and Public Sector GCP work
- ◆ CTS Managed Services are built on continuous improvement, not just keeping the lights on
- ◆ CTS' GCP commit has grown by 100% in under twelve months

“It is important to choose a team of people that are easy to work with and will act as a true extension of your business. CTS has a clear partnership ethos, which allowed them to properly integrate with our company. This is essential when looking for the right partner.”

Robert Howes, CTO, Judopay
