

cts

Google. Done right.

**Our customers want to differentiate
by leveraging Google's technology
and culture of innovation.**

**CTS's mission is to spark, enable
and empower just that.**

Spark

You need the ability to grow and innovate at scale - with the right infrastructure to support your ambitions

"On-premise infrastructure was hindering our growth. We needed a solution that would give us scalability on demand, world-class performance, high availability and resilience - whilst supporting our vision of becoming a data-driven company."

Ted van Dongen, CIO at VidaXL

The logo for VidaXL.com, featuring the text "vidaxl.com" in a stylized font with a circular arrow icon around the "l", and the tagline "live it up for less" underneath.

live it up for less

Enable

This way, you can unlock your data's full potential - so you can make smarter and faster decisions...

“We want to be able to make data-driven decisions. However, interpreting data gathered from multiple internal and external sources posed a big challenge. We needed an effective way to access, analyse and report on our insights across the business.”

Jon Davis, CTO Village Hotels

Empower

Transform the way your organisation works - fostering a culture of collaboration and innovation

"Having a well-managed IT system is crucial in ensuring our business is efficient and collaborative. CTS quickly demonstrated to us that they understood the needs of an organisation of our scale and how we can make Google Workspace work harder for us."

Matt Greaves, Technical Director, Travis Perkins

You are in good company!

How do we help?

Start a Google inspired transformation.

Innovation

(Transformation Workshops, Hackathons, Innovation Accelerators (POCs / POVs))

Bring it to life and get it done right.

Spark

'Think Big' &
High Velocity Migrations

Enable

Operational Efficiency
with Data & ML

Empower

Google Workspace & Chrome
Deployed
No Code Development

Sustain innovation, manage and iteratively improve.

Managed Services

(GCP and Workspace)

Google. Done right

- CTS was **born in Google Cloud**, it's all we've ever done or will do
- **Certified and audited by Google** to the highest level, including accredited MSP, expertise across migration, infrastructure, data and work transformation
- **Largest dedicated Google Partner in EMEA** (people, certifications, and depth of case studies)
- **Proven track record** and repeatable methodology
- Current holders of **Partner of the Year** for Workspace Enterprise deployments, and Public Sector GCP work
